- **Flashing Light Beacon** - It is a tool to flag down passing vehicles by to ask for help. It also helps in alerting passing cars on your existence when you are changing the tire at the side of the road. (works for 72 hours non-stop).
- **Flashlight** - The ultra brightness LED flashlight is useful to find your way in darkest places. White LED light is used instead of yellow because this eases the user in identifying blood on the victim.
- **Magnetic Base** - It can be absorbed on the car (any iron objects), it's very convenient no matter in flashing warning condition or in emergency lighting condition.
- **Additional: Water proof**

## II. How to use this life hammer?

- Store in vehicle console, map pocket or glove box
- Cut jammed safety belt
- Break jammed windows
- Stick on the car roof, switch on the flashing LED
- Light when in dark (switch on the flashlight)
